To briefly introduce myself, I am passionate about data and statistics and thrive on interdisciplinary growth. With a strong foundation in data analysis, statistics, and process optimization, I have gained hands-on experience in data-driven decision-making through cross-functional collaborations and a background in BPO and account management. I want to work in a data-focused role that encourages research and innovation - one where I can potentially apply techniques like advanced statistics or machine learning when needed, continuously improve my programming skills, and most importantly, feel that I'm adding real value through my work. You can explore my self-driven projects through the links I've shared.

Education

Istanbul Arel University *MBA, Thesis: Lean Six Sigma and implementation of service sector* **Istanbul 2019 – 2022**

Istanbul University *MSc in Statistics, Completed coursework* **Istanbul 2018 – 2019**

Certificates

- The Professional Scrum Product Owner PSPO I
- The Professional Scrum Master I PSM I
- Programming for Data Science with Python, Udacity
- Lean Six Sigma Black Belt, CSSC
- Data Scientist, Udacity
- Data Analytics for LSS, University of Amsterdam

Professional Skills

- Business Intelligence
- Customer Analytics and Insights
- Client, Stakeholder Management
- Data Analysis
- Data Visualization
- Data Storytelling
- Feature Engineering
- Process Optimization
- Statistics

Experience

CXFort, Onsite *Customer Support Specialist* **St. Julian's/Malta Nov 2024 – Ongoing**

- Working in the service sector within the iGaming industry has provided me with valuable experience and insights into customer dynamics and operational processes.

Pardus Tech, Remote *Co-Founder, Data Analyst* **Kuşadası Aug 2023 – Aug 2024**

- Designed POC system for real-time IoT data analysis using OSI PI Historian.
- Created dashboards for error visualization, improving production efficiency.
- Provided data support for decision-making and validated final product quality.

Career Break & Professional Development **Kuşadası – Istanbul Dec 2022 – Aug 2023**

- Conducted a master's thesis titled 'Lean Six Sigma and Implementation in the Service Sector,' based on a six-month real-world project. Achieved a 12% increase in overall CSAT, with a 34% improvement in the focused topic area (a key DSAT driver) by 56%.
- Earned certifications and shared projects on Kaggle and personal website.

Teleperformance/Google, Hybrid *Business Intelligence Specialist* **Istanbul Apr 2021 – Dec 2022**

- Customized dashboards using Looker and Power BI, harmonized data from multiple sources using SQL.
- Identified bottlenecks and designed reporting systems for actionable insights.
- Systematic processing and routing of incoming data to relevant fields. Creating a reporting system and designing the data structure for it.

Teleperformance/Lenovo, Onsite *CX lead, Account management* **Istanbul Oct 2019 – Apr 2021**

- Led CX improvements for Lenovo through data-driven insights, agile feedback systems, strategic roadmaps, and operational optimizations to deliver innovative solutions.

Dataduck, Remote *Support Team Turkey Coordinator* **St. Petersburg Jul 2017 – Apr 2019**

- Managed remote teams, optimized CX via CRM, authored guides, led Turkey projects, and connected customer insights to key departments.
